Temporary List

This Document is still currently subject to various formatting changes, and therefore the writer may not have figured out all of the details concerning any refinements as such. The potential does exist for this document to have a variable amount of mistakes (usually in the basic format) whether new or old of which will not have been done intentionally, and may be updated frequently.

Yes there absolutely is a purpose for reciting, and reading these works in a various different orders, and also for whatever purpose or circumstance a person may be subject to as well as whatever order the reader would like to read/recite them. The discerning viewer can also read the same one repeatedly of which the father can more strongly declare his power through any given person based upon the underlying control of his will through the will of that person that wields them as well as what these writings are intended to accomplish. I would suggest during these hard times to recite these works regularly for yourself, and also for others, and all people in order for people to understand that the messages within these writings have a variable meaning/purpose, and can have a stronger effect on the being of a person by the power of the father YHWH Creator of the dry wind over the waters of the land, and the elevated sky above the earth than anyone may be actively aware, or that I am personally able to show people meaning that the reader may know something that I am not currently aware of myself though the secrecy of of his great wisdom..

Suggestion: It would be a good gesture for everyone that believes or really whoever would like to recite these for Yourself, and for ALL others on a regular basis in order to give worldwide support to all believers, and unbelievers due to the high amount of great atrocities occurring all around the world. The reader should also keep in mind that though if you do not put on believe **WITHOUT** a single shred of disbelief whether it would exist as a hidden intention of the heart even if a person may not be directly aware otherwise there exists the indefinite capacity to hinder the power of YHWH in all things especially in regard to your belief because of the lingering thread of idol thought of which is by far one of the most potentially dangerous, and adverse aspects among humanity. This can lead to a great deal of abominable deeds done by that person due to the personal limitations that have been set upon the furrow of that persons brow in there own discernment, and to put this simply without being overly-simplistic we should all be mindful of our own Double-Mindedness. Learning to avoid this at all costs, but keep to mind that the more you ask of YHWH the more that he will require from that person's hand in return for his wonderful deeds. Do not be discouraged by the length of these works they do take plenty of time to memorize even for me being like anyone else, but is not impossible to do.
